EXAM SHIELD

Cloud Computing Question Bank

Service and deployment models, scaling, storage and shared responsibility.

13 questions: 8 multiple choice, 3 fill in the gap and 2 written. Total 21 marks.
Edition: with answers (staff copy, ready to import into Exam Shield).

How this paper is laid out

Questions are numbered in one sequence. Multiple-choice options are lettered with a full stop; each multiple-choice question is worth one mark unless stated.

Fill-in-the-gap questions show each blank as a line; they earn one mark per blank, shown in square brackets, and are marked automatically.

Written questions show their marks in square brackets and are marked by an examiner.

To use this paper in Exam Shield, open an exam, choose Questions and then Import from PDF, and upload this file. Review the preview and import.

Section 1: Cloud Computing

Service and deployment models, scaling, storage and shared responsibility.

1. Which cloud service model gives customers virtual machines, storage and networks to manage themselves?

A. IaaS
B. PaaS
C. FaaS
D. SaaS

Answer: A

2. Gmail and Microsoft 365 are examples of which service model?

A. PaaS
B. IaaS
C. On-premises software
D. SaaS

Answer: D

3. Serverless functions are mainly billed by:

A. Servers rented per month
B. A fixed annual licence
C. Disk size only
D. Invocations and execution time

Answer: D

4. Automatically adding instances when load rises is called:

A. Auto-scaling
B. Vertical scaling
C. Load shedding
D. Caching

Answer: A

5. In IaaS, who secures the physical data centre under the shared responsibility model?

A. Both equally
B. Nobody
C. The customer
D. The cloud provider

Answer: D

6. Which tool orchestrates containers across a cluster of machines?

A. Jenkins
B. Kubernetes
C. Grafana
D. Git

Answer: B

7. A deployment combining a private data centre with a public cloud is a:

A. Community cloud
B. Single-tenant cloud
C. Edge cloud
D. Hybrid cloud

Answer: D

8. Object storage services such as Amazon S3 store data as:

A. Objects in buckets
B. Files on tape
C. Blocks on a mounted disk
D. Rows in tables

Answer: A

9. Paying only for the resources actually consumed is called _____-as-you-go pricing. [1 mark]

Answer: pay

10. Incoming traffic is spread across several servers by a load _____. [1 mark]

Answer: balancer

11. Running code without provisioning or managing servers is known as _____ computing. [1 mark]

Answer: serverless

12. Compare IaaS, PaaS and SaaS, giving an example of each and the customer's responsibilities in each. [5 marks]

13. Discuss vendor lock-in and data sovereignty risks when a university moves to the cloud, and how to reduce them. [5 marks]
